## TELEHEALTH/VIRTUAL APPOINTMENTS:

A HIPAA approved video conferencing portal will be made available through a secure link for the option of teletherapy appointments.

1. **Risks to confidentiality:** Because teletherapy sessions take place outside of the typical office setting, there is potential for third parties to overhear sessions if they are not conducted in a secure environment. We will take reasonable steps to ensure the privacy and security of your information, and it is important for you to review your own security measures and ensure that they are adequate to protect information on your end. You should participate in therapy only while in a room or area where other people are not present and cannot overhear the conversation.
2. **Issues related to technology:** There are risks inherent in the use of technology for therapy that are important to understand, such as: potential for technology to fail during a session, potential that transmission of confidential information could be interrupted by unauthorized parties, or potential for electronically stored information to be accessed by unauthorized parties.
3. **Crisis management and intervention:** As a general rule we will not engage in teletherapy with patients who are in a crisis situation. Before engaging in teletherapy, we will develop an emergency response plan or safety plan to address potential crisis situations that may arise during the course of our teletherapy work. It is urgent that you share with your therapist any thought that you may have of harming yourself; and any history that you may have of suicide attempts or hospital treatment which you received for suicidal thoughts.
4. **Efficacy:** While most research has failed to demonstrate that teletherapy is less effective than in person psychotherapy, some experienced mental health professionals believe that something is lost by not being in the same room. For example, there is debate about one's ability when doing remote work to fully process non-verbal information. If you ever have concerns about misunderstandings between you and your therapist related to the use of technology, please bring up such concerns immediately and your therapist will address the potential misunderstanding together
5. If the session cuts out, meaning the technological connection fails, and you are having an emergency do not call us back, but call 911 or go to your nearest emergency room.
6. If there is a technological failure and we are unable to resume the connection, you will only be charged the prorated amount of actual session time.

## FINANCIAL POLICIES:

### CONFIDENTIALITY OF INFORMATION:

Laws ensuring your right to privacy protects matters discussed with your therapist. Cases where information may be disclosed without your consent include:

1. When child abuse is known or suspected (reporting is required by law)
2. When the abuse of an elderly or depended person is known or suspected (required by law)
3. If you commit a crime against a staff member of another person in the premises,
4. If there is a situation that is potentially life threatening.

Use of information in records for criminal investigation/prosecution is strictly prohibited.

### RETENTION OF RECORDS:

Treatment records are retained for a period of seven years following the termination of treatment for adults and until ages 28 in the case of minors. At the end of that period the records are destroyed in a manner that assures the confidentiality of the information unless the client requests otherwise, in writing, prior to the destruction of records.

### INFORMATION REGARDING PSYCHOTHERAPY:

Psychotherapy may involve remembering unpleasant events and can arouse intense emotions of fear and anger; feelings of anxiety, depression, frustration, loneliness and helplessness may be experienced. Also feelings of relief, energy, power, self-acceptance, and well-being may also occur. Psychotherapy is not always effective and may, in some cases; result in deterioration rather than improvement of a client's psychological functioning. Psychotherapy has been shown effective in about 75% of cases. There are numerous forms of psychotherapy, which vary, not only underlying theory and methods employed, but also in terms of time commitment and cost. We will attempt to provide treatment that is realistic in both areas.

### ADDITIONAL INFORMATION REGARDING THERAPY:

1. I understand the therapist provides therapy to individuals, couples, and families from a systems perspective utilizing therapeutic approaches/models associated with the marriage and family therapy profession.
2. I understand that the therapist is/are bound by the Code of Ethics set forth by the American Association for Marriage and Family Therapy (AAMFT) and that I can request a copy of those ethics at any time.
3. I understand the risks and benefits associated with therapy and have discussed those with the therapist.
4. Depending upon a client's condition, there may be available alternatives to psychotherapy, such as medication or behavior modification; we will make these recommendations if they are appropriate, based upon our assessment.
5. I understand that I may leave therapy at any time.
6. I understand if there is no session activity or phone contact recorded in my file for a period of 3 weeks and I do not respond to my therapist's attempts to make contact with me, my file will automatically be closed. I understand that, in most circumstances, my file can be re-opened upon completion of a new intake and payment of any balance due.

**Elise Bennett, LLC  
NOTICE OF PRIVACY PRACTICES**

**HIPAA**

THIS NOTICE DESCRIBES HOW MEDICAL INFORMATION ABOUT YOU MAYBE USED AND DISCLOSED AND HOW YOU CAN GET ACCESS TO THIS INFORMATION. PLEASE REVIEW IT CAREFULLY.

**What is “Medical Information”?**

The term “medical information” is synonymous with the terms “personal health information” and “protected health information” for purposes of this Notice. It essentially means any individually identifiable health information (either directly or indirectly identifiable), whether oral or recorded in any form or medium, that is created or received by a health care provider (me), health plan, or others and relates to the past, present, or future physical or mental health or condition of an individual (you); the provision of health care (e.g., mental health) to an individual (you); or the past, present, or future payment for the provision of health care to an individual (you). Elise Bennett is a Licensed Clinical Marriage and Family Therapist in the State of Missouri. Elise creates and maintains treatment records that contain individually identifiable health information about you. These records are generally referred to as “medical records” or “mental health records,” and this notice, among other things, concerns the privacy and confidentiality of those records and the information contained therein.

**Uses and Disclosures Without Your Authorization**

For Treatment, Payment, or Health Care Operations Federal privacy rules (regulations) allow health care providers who have a direct treatment relationship with the patient (you) to use or disclose the patient’s personal health information, without the patient’s written authorization, to carry out the health care provider’s own treatment, payment, or health care operations. Elise may also disclose your protected health information for the treatment activities of any health care provider. This too can be done without your written authorization.

An example of a use or disclosure for treatment purposes: If Elise decides to consult with another licensed health care provider about your condition, she would be permitted to use and disclose your personal health information, which is otherwise confidential, in order to assist him in the diagnosis or treatment of your mental health condition. Disclosures for treatment purposes are not limited to the minimum necessary standard. because physicians and other health care providers need access to the full record and/or full and complete information in order to provide quality care. The word “treatment” includes, among other things, the coordination and management of health care among health care providers or by a health care provider with a third party, consultations between health care providers, and referrals of a patient for health care from one health care provider to another. An example of a use or disclosure for payment purposes: If your health plan requests a copy of your health records, or a portion thereof, in order to determine whether or not payment is warranted under the terms of your policy or contract, Elise is permitted to use and disclose your personal health information. An example of a use or disclosure for health care operations purposes: If your health plan decides to audit my practice in order to review my competence and my performance, the competence and performance of Elise, or to detect possible fraud or abuse, your mental health records may be used or disclosed for those purposes .PLEASE NOTE: Elise or someone else in my practice acting with my authority, may contact you to provide appointment reminders or information about treatment alternatives or other health-related benefits and services that may be of interest to you. Your prior written authorization is not required for such contact.
